Nothing in these materials is an offer to sell any of the components or devices referenced herein.

©2016 Qualcomm Technologies, Inc. and/or its affiliated companies. All Rights Reserved.

Qualcomm is a trademark of Qualcomm Incorporated, registered in the United States and other countries. Other products and brand names may be trademarks or registered trademarks of their respective owners.

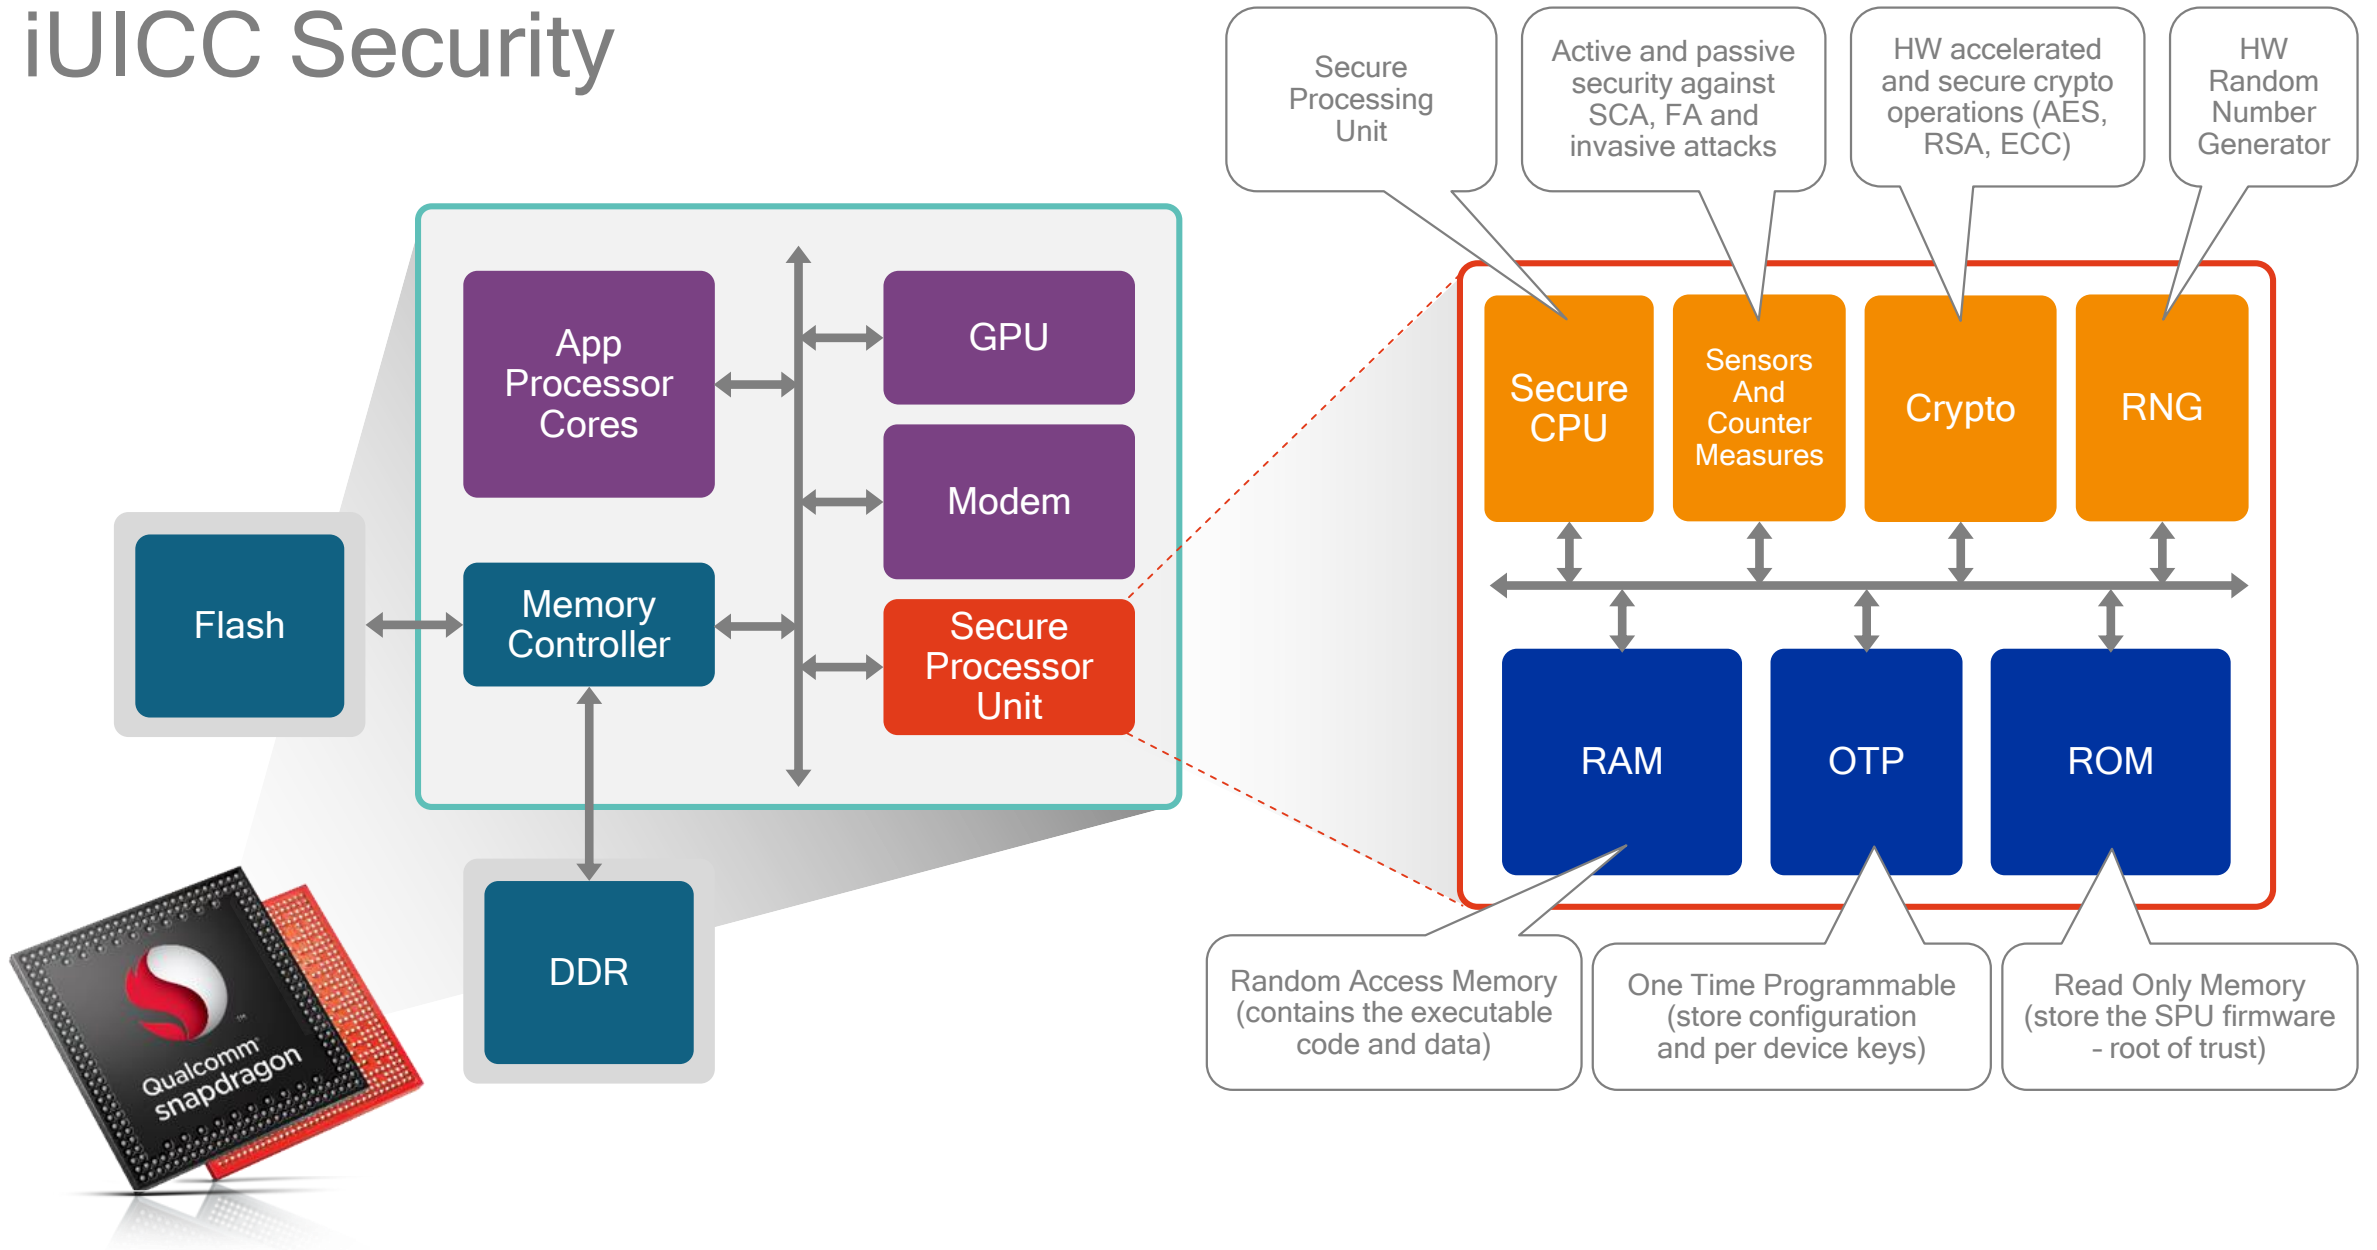

References in this presentation to “Qualcomm” may mean Qualcomm Incorporated, Qualcomm Technologies, Inc., and/or other subsidiaries or business units within the Qualcomm corporate structure, as applicable. Qualcomm Incorporated includes Qualcomm’s licensing business, QTL, and the vast majority of its patent portfolio. Qualcomm Technologies, Inc., a wholly-owned subsidiary of Qualcomm Incorporated, operates, along with its subsidiaries, substantially all of Qualcomm’s engineering, research and development functions, and substantially all of its product and services businesses, including its semiconductor business, QCT.

Additional Material

iUICC Security

iUICC Security

The **Secure Processor Unit** is equivalent to a discrete smartcard Secure IC except that it does not host Flash memory

Code and Data at rest are stored in the device Flash with a high level of security enforced by SPU:

- **Confidentiality**
(AES-256 encryption)
- **Authenticity**
(CMAC-AES-256)
- **Anti-Rollback**
(version counter handle and stored in SPU)

Qualcomm® iUICC design is targeting EAL4+ certification according to PP084 (Secure IC Platform)
