Product Marketing Manager

June 30th 2023

Valid in numbers

USD 361 million net revenue in 2022
USD 93 million normalized EBITDA

3rd DL/ID manufacturer globally
5th SIMcard manufacturer globally

Revenue distribution
40% Brazil vs **60%** International

+ 900 million connected devices
use Valid's technology

+65 years of history of the group
+25 years for Valid Mobile

+ 250 million national documents
issued in a year

+ 4.000 Employees around the world
+15 offices of around the world

+ 700 million transactions made
everyday using Valid's technology

Get to know Valid's Verticals

We are organized by business verticals, which helps us to better understand and display the world of solutions we develop.

Valid ID

Solutions for the **secure validation and identification** of people through physical or digital documents, objects, certificates and platforms, for identification and fraud prevention.

Valid Mobile

Solutions for the **Telecommunications market**, serving both connectivity providers and mobile device makers, such as SIM Cards, eSIMs, Subscription Management, iSE, to **secure connectivity and guarantee interoperability**, connecting people, companies and objects efficiently and with secure processes.

Valid Pay

Solutions for **means of payments**, from the manufacture of payment cards to the ecosystem of **digital payments**.

Where we are?

The natural evolution of our physical product offering

Traditional SIM Cards

eSIM (embedded)

iSIM (integrated)

SIM Card 4FF

Micromodule
(D18)

DFN 5x6
(MFF2)

WLCSP

iSIM

Valid's eSIM offering

eSIM main benefits for OEMs

BOM reduction

Less components
needed
Less manufacturing
processes

Size reduction

MFF2 and specially
WLCSP or even
integrated SIM are key
for miniaturizing
devices

Reliability improvement

Removing the physical
SIM trays makes the
cuts in the middle
frame unnecessary
and reduces bending
RMA and risks

Cutting Edge technology

Improves end-
customer satisfaction
and makes MNO
changes easier and
faster

Valid

The POS project

An overview of the POS market in 2023

POS solution provides convenient means for customer to make payments

Rapidly evolving to incorporate technologies such as eSIM, 5G, AI, cryptocurrency and cloud

SoftPOS as a game changer
NFC-enabled smartphone emulating a payment terminal

The number of merchants deploying softPOS solutions is expected to rise from the current 6 million to 34.5 million globally in 2027.

The challenges for eSIM-enabled devices deployed globally

Connectivity

Data security

Cibersecurity

Transaction
fees and
speed

The inconveniences solved by eSIM providers

Inconvenient transactions

Low business efficiency

Unhappy customers

Security vulnerabilities

Key advantages of cellular connectivity vs WiFi

Enhanced speed, reliability and capability of advanced mobile networks

Initial onboarding efforts are reduced for end customers and for IT departments when massively deploying

Carrier change is much easier and faster for device owners

Our HW partners for eSIM

紫光同芯 TMC
TONGXIN MICRO

THD89 eSIM consumer

Secure and certified solution EAL5

Small WLCSP package (5mm²)

GSMA SAS-UP accredited production sites

Valid

Integrated eSIM Operating System on top of our partners HW

- OS GSMA compliant with Remote SIM provisioning
 - SGP22 v3
 - GSMA-certified
 - Proven interoperability (GSMA LITE and internally validated)
 - 5G connectivity compliant solutions
