

**Global 5G Alliances Summit
@MWC Barcelona 2024**

by the GSMA APAC 5G Industry Community

Thursday 29 February 2024
10:00 - 12:30 GMT+1

Registration: <https://bit.ly/mwc5Gsummit>

According to GSMA Intelligence, 5G connections surpassed 1.5 billion at the end of 2023 – before reaching two billion by the end 2025. This momentum confirms 5G as the fastest generational roll-out, when compared to 3G and 4G. Growth will also come from key markets within APAC and LATAM, such as Brazil and India, which have launched 5G networks. China starts to deploy 5G-Advanced technologies including Redcap. The enterprise market will be the main driver of 5G revenue growth over the next decade. Edge computing and IoT technology presents further opportunities for 5G, with 12% of operators having already launched private wireless solutions – a figure that will grow with a wider range of expected IoT deployments in 2024.

The Global 5G Alliances Summit powered by GSMA APAC 5G Industry Community will be hosted on 29 Feb morning 10:00-12:30pm at [MWC Barcelona](#). The Summit will bring together global 5G leaders, Alliances and Association. Topics include:

- Overview of 5G development
- Opportunities and trend for enterprises in 5G era
- Latest private network deployment
- Discussion on ecosystem development and joint work for scaling

Welcome to reserve your seat with Terence Wong at twong@gsma.com

APAC 5G Industry Community spotlight

Manufacturing Summit

Industry experts across the manufacturing and telco sectors will discuss a range of topics from smart factories, the adoption of 5G, to the rise of Industrial AI.

[Register](#)

Smart Mobility Summit

Explore the connected vehicle and uncrewed aircraft revolutions, as well as how connectivity, automation, and digital twin transforming mobility.

[Register](#)

Sports and Entertainment Summit

Experts in the sports and entertainment industry will discuss how technology is improving the fan experience and what's next for Digital Gaming, amongst other things.

[Register](#)

Connected Skies: Shaping Business Models for the Evolving UAV Service

Co-hosted by GSMA Smart Mobility Team and Amsterdam Drone Week, an expert panel delved into various business models.
