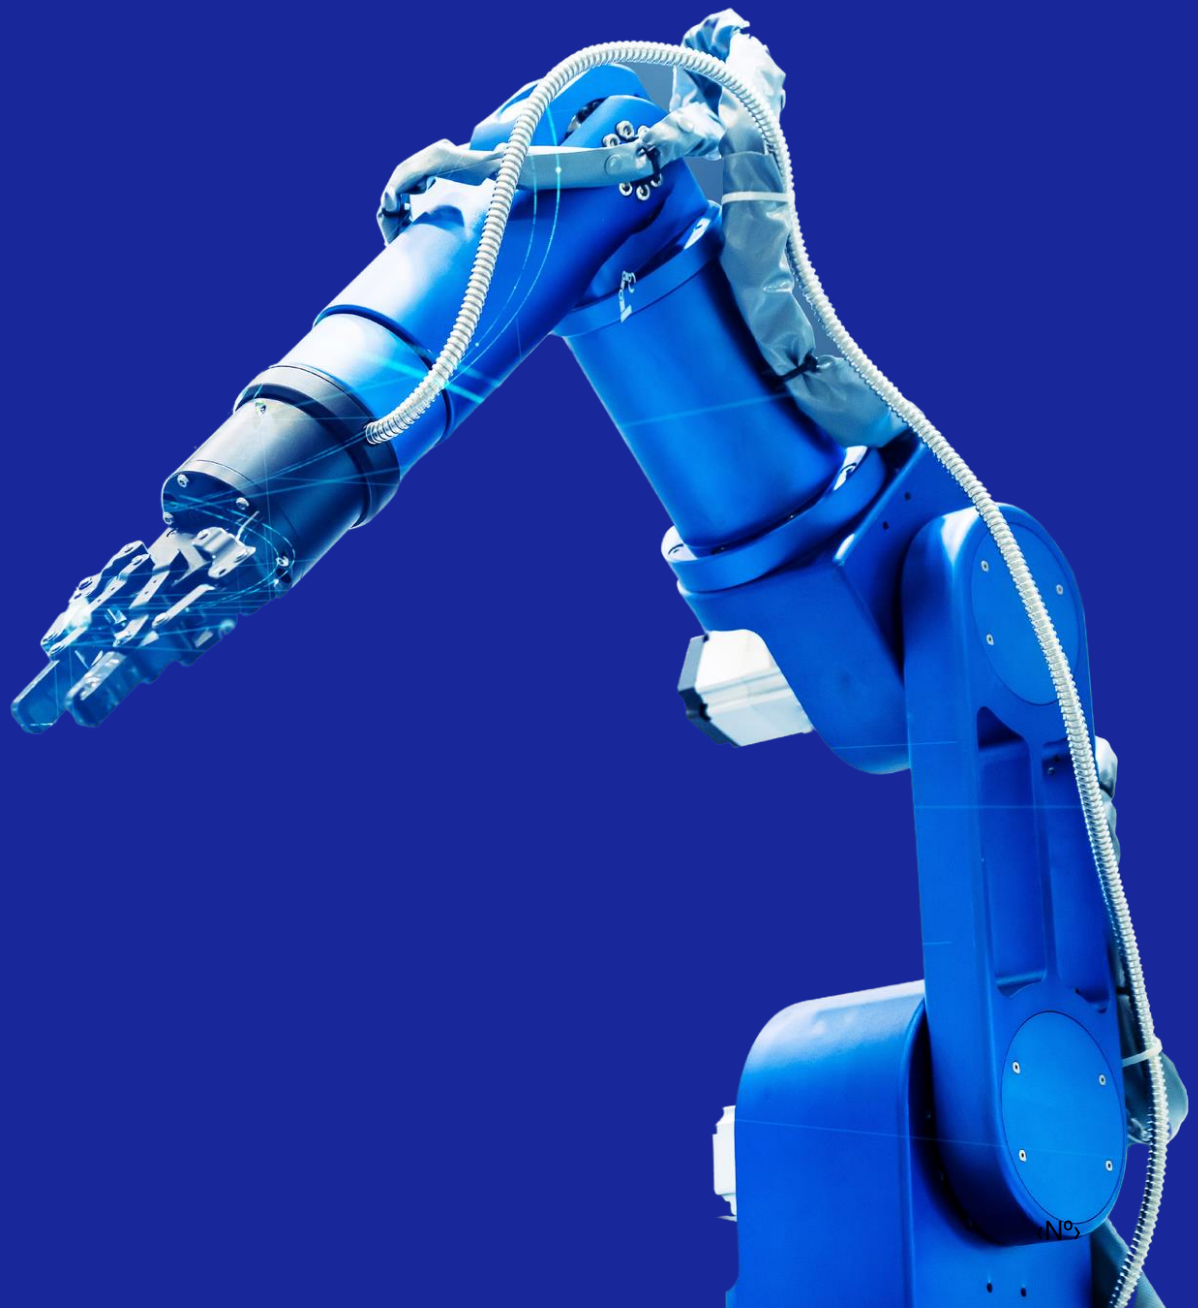
eSIM is Driving the Industry Transformation

Valid

The Evolving Landscape of Connected Industries

The Industry 4.0 is transforming industries with **advanced connectivity and automation**

IoT is set to be everywhere, shaping the future of innovation



Valid

Emerging Trends Shaping Connected Industries

- Increased Automation
- Smart Manufacturing
- Predictive Maintenance
- Sustainability Focus
- Artificial Intelligence

Valid

How can Valid guide industries to be safely connected?

Customized Connectivity Solutions

Partnerships and Collaborations

Cost-Effective Solutions

Valid

Complementing the eSIM: In Factory Provisioning

- Streamline the activation process by provisioning eSIMs directly during manufacturing.
- Ensure devices are ready for immediate deployment, reducing time to market.
- Enhance supply chain efficiency and minimize operational costs.

Valid

Complementing the eSIM: SAFE Applet including Private networks

SAFE Applet:

- Provide a secure applet for managing sensitive data on eSIMs.
- Enable enhanced security features for applications requiring high levels of data protection.

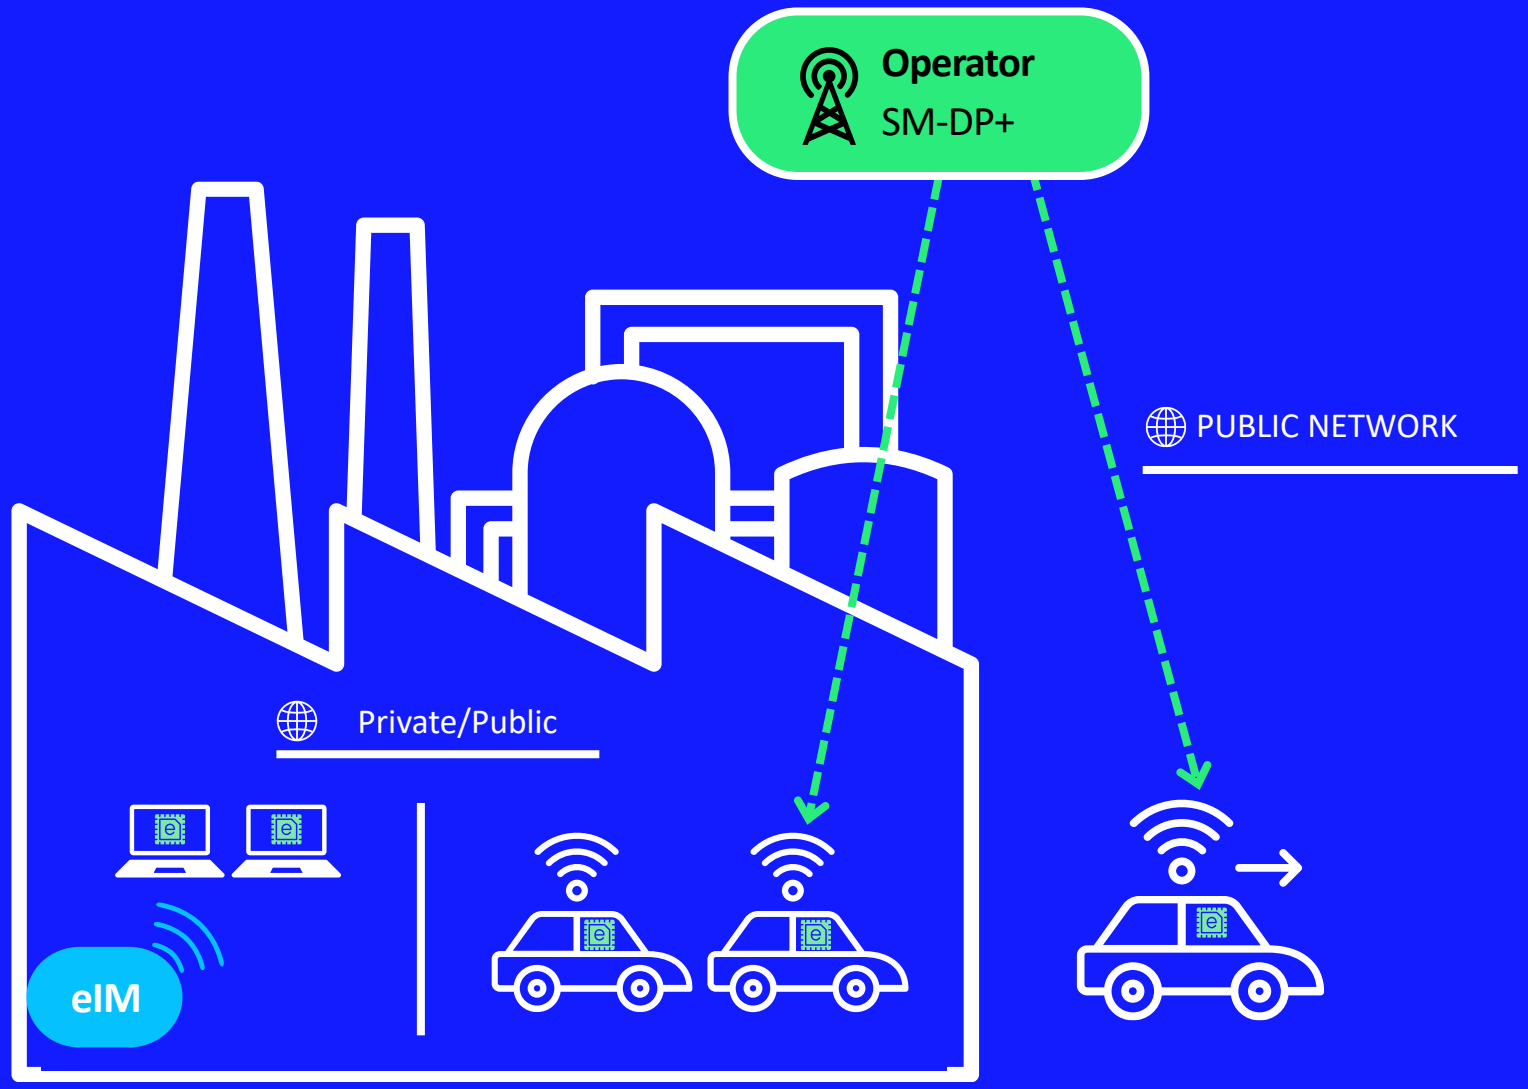
Private Networks:

- Specific Profiles for Private Networks.
- Change from Private Network Profile to the Public Network Profile easily

Valid

Joining forces for a Connected Industry

- The Security of the eSIM
- The flexibility of the SGP.32
- The power of the IFP
- The intelligence of the networks



Valid

Because all together, we are building a better, more secured, connected and interoperable new world.
