Come and join the GSMA IoT Community

Our Focus in 2023 is Energy and Environment

- **Energy** and the **Environment** are the biggest topics affecting everyone on the planet right now
- We have **ready-made solutions** that will automate how we deal with connected energy and environmental devices. We need to maximise the use of connectivity and data.
- **5G IoT (Massive, LTE-M, NB-IoT)** is the best placed connectivity today for solutions
- We have the infrastructure that is ideally suited but don't have the recognition of the role the Telco industry plays
- Come and join the **5G IoT Forum** if you are a GSMA member
